

ORGANIC INSECT CONTROL

5,000 sq. ft. #12202

THE NEW AMERICAN LAWN™

FOR LAWNS & LANDSCAPE AREAS

SAFE AROUND CHILDREN, PETS & THE ENVIRONMENT

Insect pests can be particularly troublesome if left unchecked. Jonathan Green Organic Insect Control is safe to use around children and pets and will not harm the environment. Use on lawns and ornamental landscape areas to kill and repel over 100 insect pests; including ants, armyworms, billbugs, centipedes, chiggers, chinch bugs, crickets, fleas, earwigs, grasshoppers, spiders, ticks and more. Made from a blend of organic plants oils that are EPA exempt, and has been extensively tested at many of the nation's leading universities and independent research laboratories.

- Kills and repels over 100 insect pests including ants, fleas, spiders, ticks and more with a blend of organic plant oils
- Environmentally safe - EPA exempt (25-b) product
- Use for lawns, landscape areas and outdoor perimeter home treatment
- Uses scientific technology based on natural defenses that plants use to protect themselves against insects and disease, causes immediate "knock-down," followed rapidly by the insects' death
- No adverse effect on mammals, birds or fish
- Botanical formulas have strong repellency characteristics, keeping new bugs out of the area
