# WINTER SURVIVAL

## Fall Lawn Food

HELPS REPAIR  
LAWN FROM  
SUMMER DAMAGE

IDEAL FOR  
FALL  
SEEDING

HELPS PROTECT  
LAWN FROM  
WINTER STRESS

PROMOTES DEEP ROOTING IN FALL...  
AND A QUICKER GREEN-UP IN SPRING!

**10-0-20**

### THE NEW AMERICAN LAWN

FEED YOUR LAWN  
...AND YOUR SOIL!

#### EARLY SPRING:

Apply Green-Up plus Crabgrass Preventer and MAG-I-CAL on the same day.

#### LATE SPRING:

Apply Green-Up Weed & Feed.

#### SUMMER:

Apply Love Your Soil.

#### FALL:

Apply Winter Survival.

#### OPTIONAL APPLICATION:

If insects are a problem, apply Summer Survival Lawn Food & Insect Control anytime from June through August.

#### FALL FEEDING

Fall is a great time to grow grass and feed your lawn. Cooler temperatures and higher amounts of rainfall helps your lawn recover from summer stress. Winter Survival Fall Lawn Food provides nutrients to make your lawn thicker and greener than ever before while encouraging deeper rooting. Winter Survival Fall Lawn Food can be used on all grass types.

#### HOW TO APPLY

Apply Winter Survival Fall Lawn Food from late summer through fall. For damaged lawns apply in early fall and again 6 weeks later for a thicker, greener lawn. Apply when grass is dry and water thoroughly after applying for best results; however, product does not require watering in. You may apply MAG-I-CAL and/or LOVE YOUR SOIL in any order on the same day that you apply Winter Survival Fall Lawn Food. You can re-enter lawn area after product is applied. Apply uniformly with a lawn spreader using the chart listed below. This package applies 3 lb. of product per 1,000 square feet.

#### SEEDING LAWNS

Winter Survival Fall Lawn Food is ideal for fall seeding. Apply Winter Survival Fall Lawn Food after grass seed has been planted. You may apply MAG-I-CAL and/or LOVE YOUR SOIL in any order on the same day that you apply Winter Survival Fall Lawn Food. Water the lawn after application to activate the feeding process and get new grass plant seedlings off to a good start.

#### CARING FOR YOUR LAWN

Mow grass at 2-1/2 to 3-1/2 inches. Do not remove more than 1/3 of the grass blade at one time, with a sharp mower blade. Mulch clippings or leave them on the lawn if not wet or clumpy. One inch of water from rainfall and/or watering per week is usually adequate unless drought conditions exist.

#### SPREADER SETTINGS

The following settings are approximate for applying contents of this package at a suggested rate of 3 pounds per 1,000 square feet. Settings are based on an average walking speed. Reduce setting for slower speed; raise setting for higher speed. Check your spreader on 250 square feet and adjust to apply at the rate of .75 pounds per 250 square feet. Spreader condition, rate of walk, and humidity can all vary the rate of application. Sweep (do not wash) all fertilizer materials from surfaces immediately after application, because certain fertilizer ingredients can cause staining. Wash out spreader after each use and allow it to dry thoroughly. Treat any exposed metal spreader areas with oil to reduce corrosion.

#### BROADCAST (ROTARY) SPREADERS

Jonathan Green	Setting

Agri-Fab	1-1/2
Central	8
EZ Republic	6
Earthway (Ames)	14-1/2
Precision (Red Devil)	3
Scotts Drop	2-1/2

#### USAGE TIPS

**For rectangular lawns**  
Apply two header strips across each end for a turning area, then apply back and forth in the longest direction.

**For irregular-shaped lawns**  
Apply a header strip around the entire lawn for a turning area, then apply back and forth.

**Note:** Each pass should be within 5 feet of each other to ensure an overlap.

- Do not leave spreader open when making turns.
- For best results, do not apply on a windy day.
- Swath will vary due to weather conditions, product used and walking speed.
- Apply products only to lawn.
- To determine how much coverage you need, multiply the length of your lawn by its width. This equals your total square footage. Deduct any non-lawn areas (house, gardens, walkways, etc.). One bag covers 5,000 sq. ft.

If your spreader is not listed here, or if you bought a Jonathan Green spreader prior to 2017, please visit [www.jonathangreen.com](http://www.jonathangreen.com) for the correct setting.

#### GUARANTEED ANALYSIS

TOTAL NITROGEN (N)	10.00%
10% Urea Nitrogen*	
SOLUBLE POTASH (K <sub>2</sub> O)	20.00%
IRON (Fe)	3.00%
0.03% water soluble iron	

\*2.5% controlled release urea nitrogen from polymer coated urea. Derived from: Urea, Polymer Coated Urea, Muriate of Potash, Ferrous Sulfate.

#### CAUTION

Keep out of reach of children. Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn or garden and sweep any product that lands on the driveway, sidewalk or street back onto your lawn or garden. Sweep fertilizer off concrete surfaces to avoid staining.

#### NOTICE

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling if such use is contrary to label instructions.
