BLACK BEAUTY **PATCHER**

Jonathan Green Black Beauty Patcher is ideal for bare spot repairs and pet damaged areas in your lawn. It can be used in sunny and/or shady areas. This combination of Mulch, Grass Seed and Fertilizer contains Black Beauty Ultra grass seed, coir and rice mulch and lawn fertilizer to grow an attractive, high-quality lawn.

DIRECTIONS FOR USE

1. PREPARE

Remove dead grass and debris from the area to be seeded. Rake lightly to loosen the soil. This creates a good seed bed.

2. APPLY

Spread Jonathan Green Black Beauty Patcher evenly on the loosened soil.

3. WATER

Water the bare spot gently allowing the mulch to absorb it. Avoid the pooling of water. Keep the area moist until the grass has germinated and grown to at least 2 inches.

New grass should start to germinate within 14 days but it can take longer in a cold spring. Grass Seed germination starts when the soil temperature reaches 55° F.

The mulch will bio-degrade into the soil.

CAUTION

Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn and sweep any product that lands on the driveway, sidewalk or street back onto your lawn. Also, sweep fertilizer off concrete surfaces to avoid staining.

NOTICE

Seller makes no warranty, expressed or implied, concerning the use of this product other than as indicated on the label. Buyer assumes all risk of use and/or handling if such use is contrary to label instructions.

Store in a cool, dry place and keep out of the reach of children and pets.
