

CONTRACTOR'S GRASS SEED MIXTURE

- IDEAL FOR STABILIZATION OR TEMPORARY SEEDING
- QUICK GERMINATION AND COVER
- EXCELLENT VALUE
- GERMINATES IN 10 TO 14 DAYS (UNDER NORMAL GROWING CONDITIONS)

Contractor's Mixture is ideal for quick coverage and erosion control. Use it to help stabilize bare soil and then consider re-seeding the area with one of my quality grass seed mixtures in the future.

DIRECTIONS

SUCCESSFUL SEEDING CAN BE ACCOMPLISHED IF THESE PROCEDURES ARE FOLLOWED FOR BOTH OVERSEEDING LAWNS AND ESTABLISHING NEW LAWNS OR SODDING.

-  **1. PREPARATION:** Good seed-to-soil contact is very important in order to achieve good germination of the planted grass seed.
(a) Mow lawn before seeding.
(b) Rake dead grass and debris and loosen the soil. Add additional topsoil if needed. For larger areas, a rented thatching machine may be easier.
Apply seed to the loosened soil and then lightly rake it into the ground. Do not bury the seed more than 1/4" deep.
-  **2. Prior to seeding, apply these Jonathan Green products in any order, on the same day.**
 **Jonathan Green Veri-Green for Seeding & Sodding**
Provides the nutrients necessary for new grass growth.
 **Jonathan Green MAG-I-CAL Plus for soil compaction and pH adjustment**
Helps loosen hard, compacted soils. Provides calcium - an essential grass plant nutrient which aids in the seedling's ability to absorb nutrients.
-  **3. Seed bed should be kept moist for a few weeks while the grass seed germinates. Mow the new grass after it has reached a height of 2-1/2 to 3 inches.**
Consult your dealer concerning follow-up fertilizer applications and maintenance advice.

Jonathan Green New American Lawn Deluxe and Pro Rotary:	16
Scotts Rotary	9
Scotts Drop	13

*Go over lawn twice at this rate.

My Pledge Of Satisfaction
We have made every effort in the formulation of this product to insure that you will be satisfied with the results. If, for any reason, you are not satisfied, please write and describe the problem. Our lawn specialists will make every effort to assure your success.

Benefits of lawns: Grass slows down and absorbs water run-off and controls soil erosion while cleansing water of impurities and dust. Grass plants remove carbon dioxide from the atmosphere. A 5,000 sq. ft. lawn produces enough oxygen for 8 people daily. Lawns cool off the immediate area, about 30 degrees cooler than asphalt and about 20 degrees cooler than bare soil. Lawns reduce noise, glare and increase your property value. Leave grass clippings, if possible, so nutrients and water go back into your lawn.
