

# Black Beauty™ Heat & Drought Premium Grass Seed Blend

Turf-Pro Black Beauty Heat & Drought has been a long-time favorite blend of turf professionals across the United States because it contains Jonathan Green's most drought tolerant varieties. With roots that can grow up to 4 feet deep and a waxy leaf coating (like the skin on an apple), Black Beauty Heat & Drought holds and preserves moisture while, at the same time, limits evaporation. It also withstands heavy traffic, naturally resists insects and diseases, and thrives in sunny and shady areas.

Turf-Pro Black Beauty Heat & Drought is sure to provide you with a healthy, dark-green lawn for years to come. Seed should germinate in 10 - 14 days.

Black Beauty varieties root deeply, contain a waxy leaf coating to preserve moisture, have a uniform growth habit, and are grown by leading sod growers across the United States.
